LAWN CARE

Seeding should be done in spring or early fall. All perennial grass seeds are best.
Keep soil wet during seed germination.
A high nitrogen fertilizer should be used at least twice a year on lawns.
We recommend special long lasting lawn fertilizers such as Turf Food, or Northrup King Lawn Food, applied about 2 lbs. to 100 square feet.
Lime added once a year will help make a hardy green lawn.
Use Pax, to kill crab grass seed, spring and fall.

INSECTICIDES AND FUNGICIDES

A complete line of **ORTHO** and **ACME PRODUCTS** including Rose Dust, Vegetable Dust, All Purpose Dust and Sprays, Fruit Tree Sprays, Crabgrass Killers, Weed Killers. "Hose On" Sprayers for all types of spray and liquid weed killers.

RUBRUM, pink, recurved Lilies with red dots. Very showy. Fall blooming. Each 75c

Large field dug blooming lily plants are available during the summer months. It is a good time to pick out your favorites.

PLANTING OF LILIES

Lilies must have perfect drainage such as a gentle slope can provide. They need good air circulation to discourage insects and disease. Give them sunlight, at least until 2 P.M. Semi-shade may bring out delicate colors better.

Lilies need porous, well-aerated soil, rich in humus and well balanced fertilizer. They like a mulch of well-rotted cow manure, rich compost or peat moss—which also furnishes needed acid. Add balanced fertilizer with plenty of potash two or three times through a growing season.

Plant shallow—not more than four inches of soil covering bulbs—except for Madonnas, which have a one inch cover of soil.

HOLLAND BULBS

TO PLANT THIS FALL

For a bright display of flowers in the spring!

Plant tulips in front of evergreens, around trees, among perennials—any place where there is sunshine in the spring. Our bulbs come from Holland the first of September.

MANY TYPES OF TULIPS TO CHOOSE FROM!

BREEDER. These bloom in May with the Darwins, have long stems and dark, rich colors. They are a striking contrast with bright colored Darwins.

COTTAGE. Various shapes are found among these late single tulips. Many new varieties in this splendid garden type.

DARWIN. This favorite variety is May blooming, strong stemmed and stately. The gorgeous colors of Darwin tulips make them ideal for brightening the garden.

DARWIN-HYBRIDS. These have enormous flowers, strong stems and vivid colors. They are a new race of tulips, a cross between Darwins and Fosterianas.

EARLY DOUBLE. Beds and borders are really beautified by these showy double tulips. Large blooms and low growth makes them good for pot plants, too.

EARLY SINGLE. Brilliant colors and short stems make these ideal for garden or forcing.

FOSTERIANA. These very early tulips have huge blooms and short stems. Wonderful for early splashes of color in rock garden or border.

KAUFMANNIANA. These first tulips of the spring are small and low growing. They have lovely patterns in their centers and on the outer petals. Rock gardens or borders.

LILY-FLOWERED. The distinct Lily-like shape of these tulips of the Cottage family makes for a lovely variation in the tulip garden. May blooming.

MENDEL. One of the best tulips for forcing are the Mendels. These are hybrids from crossing early tulips with Darwins. Many interesting colors.

PARROT. These graceful blooms resemble feathers. Wonderful for arrangements with their elegance of shape and color. They bloom in May.

PEONY-FLOWERED. The double late or Peony-flowered tulips are splendid in gardens and for cutting. Medium tall. Rich colors and big fluffy blooms.

TRIUMPH. These early May blooming tulips have large blooms and strong stems. Their interesting colors and medium height make them good forcers.
